ICSE 2016 Call for Submissions

The International Conference on Software Engineering brings together researchers and practitioners from around the world for a week of presentations and discussion around leading innovations, trends, outcomes, and experiences in software engineering. A quarter-century after the first ICSE in Austin, ICSE 2016 continues the tradition of the past, fostering transformative advances in research and practice through free exchange of ideas and collaboration. In addition, this year's conference promises to be an informative and exciting event, with record number of submissions for the research track.

We invite you to help shape ICSE 2016 through submission to one or more of our many tracks for professional engagement. In particular, organizers now welcome submission of proposals for topical workshops; practice and experience papers; education papers; vision papers: predicting novel future challenges for 2025 and beyond, or proposing solutions to such challenges; doctoral student research prospectuses; proposals for technical briefings in emerging areas; posters and formal demonstrations.

See the conference website for guidelines in all submission categories.

Important Dates

SIGSOFT CAPS Program

The [SIGSOFT CAPS](#) program allows financial assistance to help students and qualifying professional members with the cost of attending SIGSOFT-sponsored conferences and workshops. This program offers three distinct services to support conference attendance:

- [CAPS-GRAD](#): Travel support for graduate students (open to SIGSOFT student members).
- [CAPS-UG](#): Travel support for undergraduate students (open to non-members).
- [CAPS-KIDS](#): Travel support to help defray cost of childcare (open to SIGSOFT student and professional members).

“New Austin” in the Texas State Capital

Austin has become a hub for technology, entrepreneurship, music, and recreation. ICSE 2016 will be in the Austin Arboretum Area—dubbed “New Austin”— and at the peak of the Texas wildflower season. It will be an ideal setting for flourishing new ideas in software engineering.

While you are here, check out some of the sights and sounds of Austin. Whether you like to visit museums, view historical sights, or take tours, there is something for everyone. For more information on the area, visit:
